

Pengana Axiom International Fund

HOW0002AU | Global Equities | Global Large Cap | Fundamental Growth

Report Published 17 October 2024 | To be read in conjunction with the fund's Lonsec Review & Rating Report

What does this Score mean?

The Sustainability Score of three bees indicates this Fund is in the middle 40% of all Lonsec-rated Global equity funds, based on the Lonsec Sustainability model using data as at 30 June 2024.

What is this Fund?

The Pengana Axiom International Ethical Fund invests in companies that are dynamically growing and changing for the better, more rapidly than generally expected and where the positive changes are not yet reflected in expectations or valuation. The most attractive companies will have positive fundamental changes occurring in their earnings growth, creating natural compounding performance tailwinds, and an attractive valuation providing upside potential and risk control benefits. The ethical policy states the permissible extent of an investee company's business involvement in screened activities.

Investment Objective

The Fund's investment objective is to obtain returns greater than the MSCI All Country World Total Return Index (net, AUD) over the medium to long term.

The Fund's Sustainable Development Goals (SDG) contribution

Estimated contribution based on a \$10,000 portfolio.
Based on fund coverage of 100%

Environmental Factors

○ MSCI World Ex Aus ● Fund

Carbon Trend

Carbon trend demonstrates the average annual percentage change in Scope 1 and Scope 2 emissions for the portfolio. An arrow to the left indicates the fund has a lower year on year carbon trend.

Climate Aligned Revenue

Climate aligned revenue is the percentage amount of revenue derived from climate impact solutions. An arrow to the left indicates a greater proportion of the portfolio invests in green climate aligned solutions.

Water Efficiency

Water efficiency is the amount, in tonnes, of cubic meter fresh water used per \$1m revenue. An arrow to the left indicates less water being used by the investments within the portfolio.

Waste Efficiency

Waste efficiency is the amount, in tonnes, of waste generated per \$1m revenue. An arrow to the left indicates less waste being generated by the investments within the portfolio.

Temperature Score

The portfolio temperature score demonstrates the warming associated with the portfolios carbon trend if the global economy followed that rate of change, in degrees Celsius. Portfolio temperature score is benchmarked against Paris Target goals to limit global warming to well below 2 degrees Celsius, preferably to 1.5 degrees Celsius.
